## EDUCATION

### University of Oklahoma

Norman, OK

*Bachelor of Business Administration, Finance*

*Aug 2020 – May 2024*

*Relevant Coursework:* Financial Modeling & Analysis, Corporate Finance, Financial Accounting, Investments, Business Data Analysis, Database Management

## PROFESSIONAL EXPERIENCE

### Software Quality Assurance Analyst | Financial Systems & Payroll

Jun 2024 – Oct 2025

*Paycom*

*Oklahoma City, OK*

- Validated financial accuracy and operational readiness across payroll and tax platforms by executing 250+ quarterly control and regression tests, maintaining a 98% completion rate prior to client releases.
- Analyzed state tax calculations, withholding requirements, tax codes, and client configurations to identify transaction discrepancies and ensure compliance with applicable requirements.
- Analyzed international payroll and cross-border banking transactions, verifying payment accuracy, processing requirements, settlement deadlines, and fee structures to support timely and accurate fund disbursement.

### Finance Lead

Apr 2023 – May 2024

*Hacklahoma*

*Norman, OK*

- Built Excel-based budgeting and forecasting models incorporating variance analysis and scenario planning, improving forecast accuracy by 30%.
- Developed financial dashboards using PivotTables, XLOOKUP, INDEX-MATCH, and data visualization to monitor budgets, expenditures, sponsorship funding, and resource utilization.
- Analyzed sponsorship revenue, operating expenses, and funding requirements to support resource-allocation decisions for events serving 170+ participants.

## PROJECTS

### Financial Scenario & Sensitivity Analysis Model | Excel

Feb 2026

- Built a 3-year financial forecasting model projecting revenue, EBITDA, net income, margins, and free cash flow across changing operating and financing assumptions.
- Developed Base, Bull, and Bear scenarios to assess the impact of revenue growth, cost structure, debt levels, and interest rates on profitability and financial performance.
- Created two-variable sensitivity analyses measuring the impact of operating assumptions and financing conditions on net income, cash flow, and downside risk.

### Stock Valuation Model (DCF) | Excel

Aug 2025

- Built an integrated three-statement financial model and discounted cash flow valuation for a publicly traded company, forecasting revenue, operating performance, free cash flow, and equity value.
- Analyzed historical income statement, balance sheet, and cash flow statement performance to develop forward-looking operating assumptions.
- Performed sensitivity and scenario analysis across revenue growth, margins, WACC, and terminal-value assumptions to evaluate valuation outcomes.

### FAA Utility Data Visualization & Automation | Python, Excel, Power BI

May 2024

- Developed a solution for the Federal Aviation Administration (FAA) to visualize and analyze mixed data sets related to utility usage (water, electricity, etc.) from 15+ Excel files and PDF documents across multiple facilities.
- Designed and implemented a data extraction process using Python, automating the parsing of 500+ PDF records and integrating structured outputs into Excel datasets, reducing manual data entry time by 70%.
- Utilized Power BI to create an interactive dashboard visualizing utility usage across 10+ buildings, enabling monthly and annual comparisons and improving reporting efficiency by 40%.

## TECHNICAL SKILLS

**Financial & Data Skills:** Microsoft Excel (Advanced: Pivot Tables, XLOOKUP, INDEX-MATCH), Financial Modeling, Forecasting, Variance Analysis, Power BI, Excel Dashboards, VBA (Macros)

**Languages:** Python, SQL, JavaScript, C#, HTML/CSS

**Productivity Tools:** Microsoft Word, PowerPoint, Microsoft Office Suite
