EDUCATION

University of Oklahoma, Norman, OK.

May 2026

Bachelor of Science in Computer Science, Mathematics minor

GPA: 4.0/4.0

Coursework: Artificial Intelligence, Advanced Machine Learning, Data Structures and Algorithms, Distributed Systems, Database Management Systems, Software Engineering, Operating Systems, Object Oriented Programming, Computer Security

SKILLS

Languages: Java, Python, TypeScript, Swift, SQL, R, C#, JavaScript, C++, PHP, HTML/CSS, C

AI/ML: Tensorflow, Keras, Pytorch, scikit learn, NLP, LLM Evaluation (Gemini), Prompt Engineering

Frameworks: SwiftUI, Next.js, UIKit, React.js, Node.js, Flask, .NET, React Native, Flutter

Other: Git, Jira, Microsoft Azure, Google Cloud, Firebase, REST APIs, Linux/Unix, CI/CD, Figma

RELEVANT EXPERIENCE

iOS Engineering Intern

May 2025 - August 2025

Paycom

Oklahoma City, OK.

- Developed a native iOS app in Swift/SwiftUI/MapKit, using MVVM architecture, enabling **1000+** sales reps to discover geo-targeted leads in real time, boosting outreach by **40%**.
- Leveraged multi-threading (GCD/async-await) throughout the app to keep the UI responsive during location lookups and API calls, cutting average lead search time by 60% via Google Places and CoreLocation integration.
- Built a Node.js/MySQL backend handling 50,000+ daily API requests, ensuring real-time CRM sync with the iOS client.

AI/ML Research Assistant

August 2024 - May 2025

University of Oklahoma

Norman, OK.

- Designed an LLM-based classification pipeline (Gemini) with prompt engineering to filter 75,000+ social media comments down to 2,500 high-confidence disinformation candidates.
- Built a Next.js survey with Flask and MySQL for **200+** participants and compared results with LLM predictions.

Software Engineering Intern

September 2024 - May 2025

Paycom

Oklahoma City, OK.

- Streamlined an automated regression test suite in C#, React.js, and MySQL, cutting manual testing workload by **40%**.
- Engineered staging and production comparison system adopted by **20+** developers, reducing pre-release defects by 25%.

Software Engineering Intern

May 2024 - August 2024

Paycom

Oklahoma City, OK.

- Launched a Q&A web app in React.js, C#, and MySQL for **8000+** employees to post, search, and filter questions.
- Implemented search, tagging, and upvote features with a .NET backend and REST APIs, improving question by **25%**.
- Won **1st** in firm-wide Hackathon, creating a resume search tool with automated keyword matching and candidate ranking.

Software Engineering Intern

January 2024 - May 2024

OU Irani Center for the Creation of Economic Wealth

Norman, OK.

- Built an AI/ML hospital app with Flutter, Firebase, and scikit-learn, boosting patient wait-time accuracy by **30%**.
- Partnered with a healthcare startup and an agile team to integrate EPIC data via Qvera, reducing storage costs by **90%**.

Programming Instructor

November 2023 - May 2024

iCode

Edmond, OK.

- Instructed Python, C#, and project building with **50+** students, resulting in a **40%** increase in assessment scores.

PROJECTS

OSCAR Power Model | React.js, Python, Express.js, Git, Pandas, Keras, Tensorflow

January 2025 - May 2025

- Designed ML models on OU's supercomputer to predict rack and system-level power consumption with **92%** accuracy.
- Configured a generic, automated pipeline for training and evaluating any model type, reducing model testing time by **50%**.

Outline | React Native, Python, Flask, PostgreSQL, Firebase, Git

January 2024 - May 2024

- Supervised a six-member team to deliver a social mobile app with features including posts, accounts, search, and following.
- Integrated OAuth2 with Firebase and optimized SQL queries, improving onboarding by **50%** and API speed by **40%**.

LEADERSHIP

Treasurer and Emcee | Arab Student Association

May 2025 - May 2026

- Allocated **\$3,500** budget to host events promoting cultural awareness and diversity for **100+** students.

Education Officer | OU Artificial Intelligence and Machine Learning Club (AI/ML)

May 2024 - May 2025

- Conduct weekly workshops for **300+** club members, covering diverse learning models and the history of AI/ML.

Vice President of Finance | Hacklahoma

June 2023 - May 2025

- Organized hackathon for **400+** students and **20+** companies, with over **\$20,000** raised and **70+** projects submitted.

Co-Founder - Vice President | Google Developers Club

October 2024 - May 2025

- Drove a community of **100+** members, organizing workshops and projects, and collaborating with regional leadership.
